

Dr Veronica Campagna

Associate, Assessments and Approvals

Veronica is an Associate with the Assessments and Approvals team in JBS&G's Perth office. Veronica has over 25 years experience as an environmental professional spanning industry, government and university sectors. She has extensive experience in environmental impact assessment, environmental management and monitoring.

Prior to joining JBS&G in 2022, she worked in the Western Australia public sector, including EPA Services Unit, for seven years. Veronica has worked as an environmental consultant since 1998 and prior to that in research. She has specifically worked for over 15 years consulting to the resource sector.

Veronica is a leading specialist in the ecology of arid zone wetlands, in particular in salt lake ecology, providing advice to government and industry. As part of her PhD she focussed on the development and application of monitoring tools which were applicable for temporary aquatic systems resulting in effective and adaptive management practices.

Veronica has a strong background in aquatic sciences. She is experienced in the study of nuisance algal and cyanobacterial blooms wetlands across Western Australia and NSW, and microbial communities including marine environments. She has managed and undertaken numerous , complicated subterranean fauna surveys across Western Australia and the NT for EIA as well as remote surveys on salt lakes.

With a strong professional network both nationally and internationally Veronica has presented at many workshops, published papers and been on organising committees of international conferences and symposia.

Responsible for project direction, client liaison, government negotiations, stakeholder engagement, coordination of technical specialists, and review of all approvals documentation. Managing EIA for both State and Commonwealth assessment. Providing specialist advice and peer review of studies on salt lakes.
